There are two dry wells under investigation behind Plant 3.

Thanks Henry. So, would it be correct to say that AOC#1 and AOC#22 are the only remaining areas on the Navy property that need further remediation?

Hi Carol,
The Navy is finalizing the record of decision to implement a remedial system for AOC 22 (UST – Fuel Oil No. 6). If everything goes OK, we may have a Corrective measure approved before March 31. Also the Navy submitted an addendum to Site 1 (soil and SVE system).

Henry Wilkie

Hi Henry – Thank you for your time this morning. The information you provided was very helpful.

I was asked to find out what work is on-going and/or still needs to be done regarding the Navy's on-site property. I know that there's the vapor intrusion system that is in-place at Site 1 (Former Drum Marshalling

Area). What is the status of cleanup for Site 1 besides the vapor intrusion system? And, are there other on-going remediations elsewhere on the Navy property?

Thank you in advance.

Regards,
-Carol-
